

# GA-200USB

## USB Condenser Microphone

### Product Introduction

This microphone is the latest generation of digital audio product design for Desktop, laptop computers and mobile phone Network voice entertainment. This microphone is free drive design, plug and play, microphone can be used on common system including WINDOWS, LINUX, etc.

Ideal for podcasting, home studio recording, field recording, and voiceover use, the GA-200 USB plugs into your computer or other device, and functions seamlessly with your favorite recording software. This side-address cardioid condenser reduces pickup of unwanted sounds from the sides and rear, and is equipped with a high-quality analog-to-digital converter (16-bit, up to 48 kHz) for excellent fidelity.

This microphone has built-in Bluetooth and also a headphone port for sound monitoring during recording or listening to the sound through the microphone itself.

Two volumes, one for adjusting the intensity and loudness of the sound and the other for adjusting the echo level.

There is also a button to mute the sound during recording, if it is active, the microphone will no longer receive and record sound.

### Specification
